

FUNCTIONS

Sure...

...our beds are not just beds. We add to all of them special functions. On all beds can lift-ups be integrated as required. A small hideout is always a good idea. Users can make an advantage of the space with storing seldom needed stuff or else. Also the lift-ups are resistant. With an hidden handle, Users can easily pull the bottom up. The inner components -mattress and slats- are simply movable this way.

Beside the lift-up, there is an electronical system installed on nearly all types of beds. Different Sound functions like gas or speed are given per remote control. The LED Lights are included to the remote control and can be selected as wished.

For those, who prefer a second bed instead of a hideout, we designed the Double Eco Car bed. So stay overs of friends or enjoying comfort with siblings find a good solution now!
